

All Coaches should print off a fresh copy of the meet sheet PDF before each meet!

- Check that the box border of the sheet is approximately 1/2 inch from each edge of the paper on most all sheets. Specifically on the first and second pages, the LEFT, RIGHT and BOTTOM border is EXACTLY 1/2 inch. The top is slightly less than 5/8 of inch.

- If these two pages measure correctly, The PDF was printed correctly without scaling and it will line up with the other team's. If you printed it and your distance from the edge of the paper to the box is more than 1/2 inch (or 5/8 on top) then your printer has reduced the form and it will not line up.

- You must select Page Scaling "none" instead of "Fit to printer margins"

Depending on your printer, these options may be slightly different. If anyone has a problem and their forms do not print correctly, they can Jim Steel at 908-963-9813.
